In re Patent Application of: McELVANEY  
For: REMOTE INTERNET TELEPHONY DEVICE  
Filed: December 11, 2000  
Serial No.: 09/734,163 Art Unit: 2645 Examiner: HOOSAIN, Allan

## AMENDMENT AFTER ALLOWANCE

Applicants submit the following proposed amendments pursuant to 37 CFR 1.312 and MPEP 714.16.

The issue fee has not been paid, and the proposed changes are needed for proper protection of the invention as described below.

Authorization to charge our deposit account is enclosed, in case the amendments entered result in additional fees.

Claim 1  
Summary of changes:

Change "transmitter" to "transceiver" each time it appears in the claim (twice). This change is requested in order to avoid possible ambiguity (the word "transmitter" is used to describe the "transceiver" when it is functioning in the transmit mode, but as written it might be misinterpreted to describe a distinct component). Support is found in the claim as originally filed.

Change "it" to "said audio information input" each time "it" appears in the claim (twice). This change is requested in order to avoid possible ambiguity as to the antecedent of "it". Support is found in the claim as originally filed.

Proposed claim, showing amendments:

1. A remote cordless internet telephony device comprising:  
a remote cordless telephone comprising a remote cordless telephone handset and a remote cordless telephone base unit;

said remote cordless telephone handset comprising a microphone, a speaker, a dialpad, a handset rf transceiver for communication with a base unit transceiver, circuitry for translating audio information input to said microphone to an rf signal as an input to said handset rf transceiver, circuitry for translating input from said handset rf [transmitter] transceiver means to an electrical signal as an input to said speaker, and circuitry for translating a keypress on said dialpad into a DTMF tone as an input to said handset rf [transmitter] transceiver;
